Color Chart

Selected Luxury microfiber leather seat cushion

Selected Microfiber Leather seat cushion

M2000

DETERMINED FOR INNOVATION,
DEVOTED FOR PERFECTION.

M200 LUXURY (with disinfection device)

Digital, intelligent and personalized

MOS intelligent dental chair control system, to get off work easily

Intelligent self-test when power-on, fault code display

HD LCD screen, With digital air pressure and rotating speed display

9 sets of chair position memory, providing customized chair position setting

Opening a new era of induction control disinfection

Built-in disinfection module

- All pipeline coverage
Full disinfection of all pipes and internal circuits of strong and weak suction.
- Built-in case, using the function once opening the cover.

One-button automatic disinfection

- Without human intervention: The disinfection program runs automatically
- Providing interruption during disinfection, continuous disinfection after power-off, automatic reminder of water shortage, Easily dealing with emergencies
- One-button to get off work easily: After the automatic disinfection is completed, the dental chair will automatically turn off the water and electricity without any operation, to ensure the safety of the equipment

Two bottles design

Water can be poured above the cap, no need to unpack the bottle traditionally and tediously.

Multifunctional foot pedal:
Controlling the lifting of dental chair and the working status of handpiece, etc. Outstanding appearance, sensitive and durable.

Extended, turnable tray
Stainless steel, sterilizable. Can be rotated 90 degrees horizontally, more storage space

Instrument tray heating water function
Can provide handpiece and 3-way syringe with warm water. Effectively reduce the soreness during treatment.

Digital display voltage, with voltage stabilizer
Directly display the digits, to protect the dental chair circuit.

Safety anti-collision function
Emergency stop when facing resistance, to avoid the misoperation.

High-grade sensor dental light

8 imported lamp bulbs from Philips	3 kinds of light mode White light, yellow light, yellow-white mixed light	2 kinds of operating mode sensorial/manual
8-20k Lux Adjustable Brightness	H_{igh} High color rendering: Excellent and comfortable lighting effects	100,000 times life testing

◀ One-stop to be standard equipped with two stools
Luxury Dentist Stool, microfiber leather, with lumbar support.
Comfortable Nurse Stool, smooth movement, working easily.

M200 STANDARD

Digital intelligence, precise treatment

MOS intelligent dental chair control system

Intelligent self-test when power-on, fault code display.

HD LCD screen, With digital air pressure and rotating speed display.

9 sets of chair position memory, providing customized chair position setting.

Intelligent electronic control, one-button water and electric switch

Offering patients a better experience

High elasticity microfiber leather
Soft and wear-resisting, comfortable when laying down for a long time.

Soft Start and Soft Stop for patient chair
Smooth movement for patient chair up and down; more relieved experience for patient.

Instrument tray heating water function
Can provide handpiece and 3-way syringe with warm water, effectively reduce the soreness during treatment
