

Build muscle and reduce fat
Firming and beautifying

Hifem EMS+RF

The industry's First
3D body beauty equipment

Working principle

It is a revolutionary non-invasive body contouring treatment device with two major technologies: high-focus electromagnetic wave technology + RF (radio frequency lipolysis and tightening). Active high-intensity exercise muscles and burn the stubborn fat in the waist, hips, thighs, and upper arms, dissolve subcutaneous fat, and tighten the skin. Build muscle, reduce fat and firm skin in 30 minutes, and experience multiple effects at one time.

Self-developed 2-in-1 handpiece

The industry's first handpiece that simultaneously emits radio frequency and highly focused electromagnetic energy.

Combination of two patented technologies (high-intensity focused electromagnetic & RF radio frequency).

The electrode energy and electromagnetic field synchronization is doubled.

Intelligent thermostat sensor, which can customize the temperature within a comfortable and safe range.

The stable output of dual power supply energy can quickly reach the deep layers of the skin.

Hifem EMS+RF

Build muscle

Reduce fat

Three functions

Muscle Building

The high-intensity focused electromagnetic technology can increase the muscle by an average of 25%, and reduce the separation of the rectus abdominis by an average of 18.8%, shaping the shape of the muscle, making the line of the muscle more beautiful.

Effective Fat Reduction

The newly added RF energy promotes blood circulation, heats the cells in the deep layers of the skin, reduces the thickness of the subcutaneous fat layer, and makes the skin contour plump and firm.

Firming and Beautifying

RF radio frequency energy penetrates deep into the skin, tightens the skin enlarged by fat, stimulates the regeneration of skin collagen, and reduces the problem of skin sagging.

Hifem EMS+RF

Applicable User

Belly fat person

Local obesity person

People who lack muscle

People with loose skin

Postpartum body repair

30% reduction in subcutaneous abdominal fat layer.

25% increase in abdominal muscles.

19% improvement in abdominal separation.

The average waist circumference is reduced by about 6 cm.

Precisely acts on the abdomen, buttocks, butterfly arms, thighs and calves.

Improve body lines and firm skin in several weeks.

Burn fat, shape and form skin, all in one step!
